

Superior Gastrointestinal Support*

Ashitaba Nano-Detox™ Nanized Ashitaba Concentrate

Promotes Ideal Gastrointestinal Health, Blood Purification, Selenium Levels and Longevity*

Key Benefits

- Promotes optimal gastrointestinal health, including stomach, intestines, liver and digestion*
- Rich in “beyond organic” selenium, facilitating an unparalleled shift in tissue selenium
- Contains chalcones, special phytonutrients for immune system support and DNA rejuvenation*
- Rich in chlorophyll and natural vitamin B12, key factors for blood, memory and nervous system*

The Nanization Process: Micro-digested Ashitaba for Spectacular Clinical Success

Our grade A ashitaba is micro-digested into extremely small, highly bio-available particles using our proprietary fermentation process. We use unique, potent multi-strain probiotic colonies to assist in our “nanization” process. This allows rapid, unmatched bio-available cellular delivery of the ashitaba’s potent factors, unlike any other ashitaba product. Many people can feel the effect of this product the very first time they take it.

Recommended Use

Adults or children (age 4 and up):
Take 1/2 teaspoon mixed in water, 1
to 2 times daily or as directed.

*Bio-energetically sequenced to achieve
a quantum shift in cellular resonance;
preserved with premium grade, certified
organic alcohol (pesticide and heavy
metal residues not detected)*

Ashitaba Nano-Detox™ - Ingredients

8 fl oz (237 ml)/bottle

Proprietary Blend: 2.5ml
Nano-Ashitaba: “Beyond Organic” Nanized Ashitaba (whole) (*Angelica
Keiskei koidzmi*)

Nano-Flora Complex: nanized enzymes, complex cell wall lysates and
ferments from 12 strains of beneficial bacteria: Lactobacillus (including
casei, acidophilus, salivarius, bulgaricus, sporogones and plantarum),
Bifidobacterium including longum and bifidum, streptococcus ther-
mophilus, providing naturally occurring vitamins (10 types), including
B complex, minerals (8 types), amino acids (18 types), superoxide dis-
mutase, lipoic acid, organic acids (includes acetic, formic acids), cell
wall lipopolysaccharide-glycopeptide complexes; Natural Preservative:
Certified organic grain neutral spirits 20% as a preservative.
